

HA600-246 Manual Trolley

Koltek Trolley type HA 600-246 is manually operated. The trolley will slide easily in the direction it is pushed. Each trolley is equipped with an operating brake* which can be used to hold the trolley in the operators desired working position.

The HA600-246 is designed for Koltek horizontal aluminium C-track type KOT246 with a Safe Working Load SWL (WLL) of maximum 600Kg.

EC type examination is based on and fulfils the provisions of EN 1808 Suspended Access Equipment and 98/37/EC with product certificate no FSS-023-00-10013. As standard the trolley is delivered natural anodised.

*) The operating brake shall not be used as storage brake when the trolley is not in use.
